1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

1) In the amendment to the specification, filed on 1/30/04, in the "cross reference to related applications", line 2, after "November 1, 2000, ", - - now US 6,713,651 - - is inserted.

2. The following is an examiner's statement of reasons for allowance: The closest prior arts are CH 550 768, US 3,217,039, US 5,736,546 and US 6,162,807. CH'768, in column 3-4, teach structurally similar compound as claimed herein(compound 5C). However, n' in the reference is always 2 or 3, and hence differs from the instant claimed structure. Also, the reference compound is para positional substituted as against ortho in herein. USA' 039, column 2, is structurally similar to compound 2C of claim 50. However, there are multiple hydroxy groups in herein as against may be two in the reference(note R can be hydroxy in the reference). US'546, in column 2, compound I, is piperazine derivative, which is structurally similar to compound 3C of claim 50. There are no hydroxy groups any where in the compound. US'807 , structure (I) is structurally similar to compound 5C in herein. However, there are few differences such as there is no methylene group between phenyl and amino nitrogen, and R7 is always sulfur containing substituent as against no such substituent in herein. There is no motivation

to arrive at the claimed compounds using the prior art of record, hence instant claims are patentable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
